

Accessories supplied with & included in the price of all new Floataway® Float Pools

- All Epsom salts needed for the first 300 to 400 float sessions
- 1 extra 50lb bag of Epsom salts
- 1 "Spa Wand" manual vacuum cleaner to remove heavy particles which may fall to the bottom of the float pool
- 1 tub of pH reducer
- 1 tub of pH increaser
- 1 tub of alkalinity increaser
- 1 tub of calcium chloride (for water hardness)
- 1 bottle of test strips for either chlorine, peroxide or bromine disinfection
- 4 disposable filters
- 1 washable filter
- 1 carbon filter
- 1 box of 250 pairs of disposable ear plugs
- 1 inflatable head rest for a single pool, 2 for a couple pool
- 1 spray bottle and hook to hold fresh water which hangs inside the float pool
- 1 water density checker to know when to add more Epsom salts
- 1 tube of silicone grease

PLEASE NOTE : we are unable to ship chlorine or peroxide disinfectant, you will have to source these locally. If you choose to disinfect with chlorine, the cheapest and best way to source this is from your local supermarket in the form of household bleach.

Documents (supplied in electronic form):

- Detailed Operator's Manual and Installation Manual if self-installing
- Safety instructions sheet for floaters
- General information sheet for first-time floaters
- Daily float pool maintenance check list
- Safety compliance form to be given to all first-time floaters
